## Our Definition of Family Values

### Who We Are

Led by president Chris Donatelli, our company has been helping homeowners love their homes since 1994. Chris only recently became the sole owner of the company, yet his experience stretches back many years. Since he first began working for his father's company, Donatelli & Sons, long ago, Chris has diligently worked to earn important industry certifications ("Green Certified Professional", "Certified Remodeler", "Green Point Rater", etc.) from respected organizations. This is true of other members of our staff as well. Yet the best resource we offer our clients is the surprising years of *experience* that our staff brings to every project. From our field staff, to our management, to our salespeople, the amount of time they have spent in the industry is what we feel makes our work of the very highest quality. This long-time experience is what enables us to analyze and solve any project challenges that arise, as well as be a true *resource* to our clients. Not only will we address your building needs, we can also educate you on the "pros and cons" of the various decisions you will have to make during your project.

### What We Do

Since its beginnings, our company has been known mostly for offering specialty services in the *Kitchen & Bath* areas of remodeling. While we are proud of the many beautiful kitchen and bath projects we have done, we have not let this work define us. Our portfolio includes all types of building projects: small interior remodels, master bedrooms suites, minor or major additions, and whole house builds. When we accept a project, we are driven more by our client's needs rather than by a desire for a project to showcase our company. Simply put, we are here to be *creative* and *responsive* to the building needs of you and your neighbors in the South Bay and Peninsula areas.

Our staff members hold the following industry certifications:

- Certified Remodeler
- Certified Remodeling Carpenter
  - Certified Lead Carpenter
- Certified Kitchen and Bath Remodeler
  - Certified Green Building Professional

## A Close Look at the Past

We recently took a look at just how our clients have found us over the years. Whether it was through a designer, an architect, a referral, or a repeat client, what we found was that our clients and projects were the result of an intricate set of strong personal relationships. We were filled with appreciation and were encouraged by the amount of repeat business that we saw. By working with some of the best architects in our area, and providing the best service to our clients, our company has become known as a trusted service. To us, this is our most valued achievement. We are proud of our work and the fact that so many of our clients think of us first when they are preparing for a new project. This continues to build our experience and knowledge of the industry. For that, we are thankful.

So if you are a past client, we thank you for your business and being part of our “family.” We hope to assist you with any future projects you may have. If you have not yet been a client of ours, we encourage you to contact us at (408) 287-4886 or go to our [website](#). We would be glad to answer any questions you have regarding your home, its performance, or any projects you may be considering.

---

## Home Maintenance Tip: Dryer Safety

Inspecting your dryer vents can help prevent accidental deaths and injuries due to fire and carbon monoxide poisoning. So take a moment this month to clean your dryer vent and exhaust duct. Also check the outside dryer vent while the dryer is operating to make sure exhaust air is escaping. If it is not, the vent or the exhaust duct may be blocked.
