Featured Project: An Inviting and Contemporary Kitchen

This beautiful kitchen was remodeled as part of a whole-house renovation. Like the rest of the house, it was designed to be both comfortable and contemporary. Earth tones and natural materials were used throughout the home and the kitchen in the cabinetry, trim, and natural color palette. However, the stainless steel appliances and artistic lighting we used help the space to feel contemporary as well.

The kitchen was remodeled using an open floor plan, connecting the kitchen and living room. Arrangements like this have become very popular, as they reflect a more casual, comfortable atmosphere that many of us cherish in our homes. A wall of energy-efficient windows lets abundant natural light into the kitchen, making it a friendly place to cook and also connecting the house to the outside.

Our staff members hold the following industry certifications:

- Certified Remodeler
- Certified Remodeling Carpenter
- Certified Lead Carpenter
- Certified Kitchen and Bath Remodeler
- Certified Green Building Professional

Home Maintenance Reminder: Have Trees and Bushes Trimmed Back from your Home

Overhanging trees and bushes can damage your home during a storm. They also can provide cover for intruders around your home. You want to have your plant life trimmed at least once a year to avoid trimming too much and harming the plants.

We hope you enjoyed our e-newsletter. Remember, you can use the link below to forward this to friends and family who might be interested, so that they can sign up for it as well. Look for us again next month!
